# W02 Introduction

To-Do Date: Apr 29 at 10:59pm

Overview

- **Tasks:** Prepare a place for hosting our webpages and create a site plan for our rafting site
- **Purpose:** This week we will continue learning about HTML. We will also be learning more about CSS (Cascading Style Sheets).

Objectives

- Become familiar with how to host our web pages on the Internet
- Improve mastery of Basic HTML
- Become familiar with CSS vocabulary
- Understand the importance of planning when starting a project
- Practice looking critically at websites
- Learn basic design principles including the importance of color and typography choice in design

Notes

Starting this week, all the assignments will build off of each other. It is critical that you do not fall behind. Learn to recognize when you are stuck and get help from peers or the instructor. There are also tons of resources available online about HTML and CSS. If there is a specific topic that is not making sense, a quick search will bring up many examples.

Remember, because this is a two-credit course, you will spend approximately 3-4 hours on homework per week.
