# W03 Introduction

To-Do Date: May 6 at 10:59pm

Overview

- **Tasks:** We will continue learning some more html, and getting introduced to CSS. We will then get some practice reading wireframes and converting them into HTML.
- **Purpose:** This will prepare us to start the HTML of our home page. Each week we will progress towards making your site look just like the wireframe, but please be aware that we won't get there for several weeks!

Objectives

- Develop basic website structures and understand their relationship to site layout.
- Learn basic html troubleshooting techniques including Validation
- Improve mastery of Basic HTML
- Learn basic image optimization techniques
- Learn about the Role of Frontend developer

Notes

Remember many of the assignments build off of each other in this course. It is critical that you do not fall behind. Learn to recognize when you are stuck and get help from peers or the instructor. There are also many resources available online about HTML and CSS. If there is a specific topic that is not making sense a quick search will bring up many examples.
